SUMMARY

IT professional with practical experience supporting and maintaining business IT environments across East Africa. Experienced in Windows environments, user and access administration, infrastructure troubleshooting, business application support, system deployments, backups, and day-to-day IT operations. Supports over 100 users across multiple locations, coordinating technical support activities and resolving infrastructure and application issues. Also experienced in using PowerShell scripting and developing internal tools to improve IT service visibility, streamline processes, and enhance operational efficiency. Combines hands-on IT operations experience with a growing focus on systems administration, infrastructure management, automation, and software engineering.

PROFESSIONAL EXPERIENCE

System Administrator 11/2026

Techwise Managed Services Limited Nairobi,Kenya

Responsible for administering, maintaining, and supporting IT systems and infrastructure to ensure reliable technology operations.

- Administer and maintain organizational IT systems and infrastructure.
- Manage user accounts, access permissions, and system configurations.
- Monitor system availability and troubleshoot infrastructure and application issues.
- Support server, network, and endpoint operations.
- Perform routine system maintenance, updates, and backup activities.
- Support business applications and resolve technical issues affecting operations.
